

Pro-Forma for Display of Information on the College Website

The Following Details are mandatory to be filled up by the Medical College and displayed on their website (once entered should be updated without removal of data)

S No.	Information of the medical college/institution	
	Year of Inception:	2007
	Government/private:	Private
1.	Name	Smt. Kashibai Navale Medical College
2.	Address with pin code	Survey No. 49/1, Off Mumbai- Pune Bypass, Pune 411 041
3.	University address with pin code	Maharashtra University of Health Sciences, Mhasrul, Vani Dindori Road, Nashik, Maharashtra 422004
4.	Official website	www.skncmcgh.org
5.	Dean/ Principal/ Director	Dr. Sachinkumar Vasanttrao Wankhede (Dean)
6.	Mobile Number	9922958458
7.	Email ID of Dean	dean@skncmcgh.org
8.	Hospital	Smt. Kashibai Navale General Hospital
9	Date and Year of Registration of the Hospital (DD/MM/YYYY)	14/09/2006
10.	Number of Beds	776 {Teaching - 602 74 (MICU - 10, BURN ICU - 6, SICU -16, NICU I (08) / NICU II(06) -14 ,PICU - 8, ICCU -10, IRCU-4, OBGY ICU - 6) OMFS-20, PAIN CLINIC-2, EMD-30, OT-48}
11.	Number of Beds for emergency	Casualty- 30
12.	Date of the First Letter of Permission(LoP) of MBBS (DD/MM/YYYY) & number of seats	28/09/2007 MBBS seats - 100

13.	Status of Recognition	<p>MBBS – Recognized (150 Admissions) MD/MS– Recognized</p> <table border="1" data-bbox="1021 296 1921 995"> <thead> <tr> <th>Sr. No.</th> <th>Name of the Course</th> <th>Recognized</th> <th>Permitted</th> <th>Total</th> </tr> </thead> <tbody> <tr><td>1</td><td>Anaesthesiology</td><td>21</td><td>00</td><td>21</td></tr> <tr><td>2</td><td>Biochemistry</td><td>02</td><td>00</td><td>02</td></tr> <tr><td>3</td><td>DVL</td><td>03</td><td>00</td><td>03</td></tr> <tr><td>4</td><td>ENT</td><td>03</td><td>00</td><td>03</td></tr> <tr><td>5</td><td>General Medicine</td><td>08</td><td>00</td><td>08</td></tr> <tr><td>6</td><td>General Surgery</td><td>08</td><td>00</td><td>08</td></tr> <tr><td>7</td><td>Microbiology</td><td>02</td><td>00</td><td>02</td></tr> <tr><td>8</td><td>OBGY</td><td>07</td><td>00</td><td>07</td></tr> <tr><td>9</td><td>Ophthalmology</td><td>03</td><td>00</td><td>03</td></tr> <tr><td>10</td><td>Orthopedics</td><td>04</td><td>00</td><td>04</td></tr> <tr><td>11</td><td>Pediatrics</td><td>05</td><td>00</td><td>05</td></tr> <tr><td>12</td><td>Pathology</td><td>07</td><td>00</td><td>07</td></tr> <tr><td>13</td><td>Pharmacology</td><td>02</td><td>00</td><td>02</td></tr> <tr><td>14</td><td>PSM</td><td>04</td><td>00</td><td>04</td></tr> <tr><td>15</td><td>Psychiatry</td><td>03</td><td>00</td><td>03</td></tr> <tr><td>16</td><td>Radio- Diagnosis</td><td>05</td><td>00</td><td>05</td></tr> <tr><td>17</td><td>TB & Chest</td><td>02</td><td>00</td><td>02</td></tr> <tr><td></td><td>Total</td><td>89</td><td>00</td><td>89</td></tr> </tbody> </table>	Sr. No.	Name of the Course	Recognized	Permitted	Total	1	Anaesthesiology	21	00	21	2	Biochemistry	02	00	02	3	DVL	03	00	03	4	ENT	03	00	03	5	General Medicine	08	00	08	6	General Surgery	08	00	08	7	Microbiology	02	00	02	8	OBGY	07	00	07	9	Ophthalmology	03	00	03	10	Orthopedics	04	00	04	11	Pediatrics	05	00	05	12	Pathology	07	00	07	13	Pharmacology	02	00	02	14	PSM	04	00	04	15	Psychiatry	03	00	03	16	Radio- Diagnosis	05	00	05	17	TB & Chest	02	00	02		Total	89	00	89

	Dr. Kulkarni Bahar Dattatray MBBS, MS 2000/02/1381,	Professor	Regular	Professor from 01/12/2014 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041	<p>Total Lecture: 08</p> <p>1.SU 28.4 (L23/70)Describe pathophysiology, clinical features, investigations and principles of management of Intra-abdominal abscess, mesenteric cyst, and retroperitoneal tumors Explain anatomical basis of Subphrenic abscess</p> <p>2. SU 28.5 (L24/70) Describe the applied Anatomy and physiology of esophagus Describe & demonstrate the external appearance, relations, blood supply, nerve supply, lymphatic drainage and applied anatomy of oesophagus</p> <p>3. SU 28.6 (L25/70) Describe the clinical features, investigations and principles of management of benign and malignant disorders of esophagus</p> <p>4. SU 28.7 (L26/70) Describe the applied anatomy and physiology of stomach Explain the anatomical basis of Splenic notch, accessory spleens, Kehr's sign, different types of vagotomy, liver biopsy (site of needle puncture), referred pain in cholecystitis, Obstructive jaundice, referred pain around umbilicus,</p>

					<p>radiating pain of kidney to groin & Lymphatic spread in carcinoma stomach Describe & identify boundaries and recesses of Lesser & Greater sac</p> <p>5. SU 28.17 (L45/70) Describe the clinical features, investigations and principles of management of common anorectal diseases</p> <p>6. SU 28.17 (L46/70) Describe the clinical features, investigations and principles of management of common anorectal diseases</p> <p>7. SU 30.1 (L59/70) Describe the clinical features, investigations and principles of management of carcinoma penis</p> <p>8. SU 24.2 (L67/70) Describe causes, clinical features, complications and principles of management of peritonitis and omental pathologies Name & identify various peritoneal folds & pouches with its explanation. Explain anatomical basis of Ascites & Peritonitis Explain anatomical basis of Subphrenic abscess</p>
	<p>Dr. Shinde Jeevan Vitthal MBBS, MS 2004/02/1042,</p>	<p>Professor 19/09/2018</p>	<p>Regular</p>	<p>Associate Professor from 27/04/2015 to 18/09/2018 and Professor from 19/09/2018 till date at Smt. Kashibai</p>	<p>Total Lecture: 08</p> <p>1.SU 16.1 (L3/70) Minimal Invasive General Surgery: Describe indications, advantages and disadvantages of Minimally Invasive General Surgery.</p>

				Navale Medical College and General Hospital, Narhe, Pune 411 041	<p>2. SU 29.1 (L47/70) Describe the causes, investigations and principles of management of Hematuria</p> <p>3. SU 29.12 (L48/70) Describe the clinical features, investigations and principles of management of congenital anomalies of genitourinary system Describe the development of urinary system</p> <p>4. SU 29.3 (L49/70) Describe the Clinical features, Investigations and principles of management of urinary tract infections Describe the etio-pathogenesis and discuss the laboratory diagnosis of infections of genitourinary system</p> <p>5. SU 29.4 (L50/70) Describe the clinical features, investigations and principles of management of hydronephrosis</p> <p>6. SU 29.5 (L51/70) Describe the clinical features, investigations and principles of management of renal calculi</p> <p>7. SU 29.5 (L52/70) Describe the clinical features, investigations and principles of management of renal calculi</p> <p>8. SU 29.6 (L53/70) Describe the clinical features, investigations and principles of management of renal tumours</p>
	Dr. Naik Suresh	Professor	Regular	Associate Professor	Total Lecture: 09

	<p>Dongarsing MBBS, MS 2003/03/1161,</p>			<p>from 01/07/2015 to 31/03/2018 and Professor from 01/04/2018 to 01/09/2019 at dr. D. Y. Patil Medical College, Hospital & Research Centre, Pune. Professor from 02/03/2021 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p>1.SU 24.1 (L8/70)Describe the clinical features, principles of investigation, prognosis and management of pancreatitis. Demonstrate the surface projections of: stomach, liver, fundus of gall bladder, spleen, duodenum, pancreas, ileocecal junction, kidneys & root of mesentery 2. SU 24.2 (L9/70)Describe the clinical features, principles of investigation, prognosis and management of pancreatic endocrine tumours 3. SU 24.3 (L10/70)Describe the principles of investigation and management of pancreatic disorders including pancreatitis and endocrine tumours.. 4. SU 26.1, 26.2 (L11/70)Outline the role of surgery in the management of coronary heart disease, valvular heart diseases and congenital heart diseases, diseases of Thorax and Diaphragm 5. SU 26. 3 (L12/70) Describe the clinical features of mediastinal diseases and the principles of management. 5. SU 26. 4 (L13/70) Describe the etiology, pathogenesis, clinical features of tumors of the lung and the principles of management 6. SU 29.7 (L54/70) Describe the principles of management of acute and chronic retention of urine</p>
--	--------------------------------------------------	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					<p>7. SU 29.8 (L55/70) Describe the clinical features, investigations and principles of management of bladder cancer</p> <p>8. SU 29.9 (L56/70) Describe the clinical features, investigations and principles of management of disorders of prostate Mention the lobes involved in benign prostatic hypertrophy & prostatic cancer</p> <p>9. SU 24.1 (L66/70) Describe the clinical features, principles of investigation, prognosis and management of pancreatitis. Demonstrate the surface projections of: stomach, liver, fundus of gall bladder, spleen, duodenum, pancreas, ileocecal junction, kidneys & root of mesentery .(Revision)</p>
	<p>Dr. Shelke Rahul Ramkrishna MBBS, MS 2000/02/1066,</p>	<p>Professor 10/05/2021</p>	<p>Regular</p>	<p>Professor from 09/10/2013 to 28/02/2019 at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041. Associate Professor from 16/04/2021 to 09/05/2021 and Professor from</p>	<p>Total Lecture: 09 1.SU 28.10 (L28/70) Describe the applied anatomy of liver. Describe the clinical features, Investigations and principles of management of liver abscess, hydatid disease, injuries and tumors of the liver Explain anatomical basis of Subphrenic abscess Liver biopsy (site of needle puncture), referred pain in cholecystitis, Obstructive jaundice</p>

				<p>10/05/2021 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041 (Resigned w.e.f. 02/01/2026AN)</p>	<p>2. SU 28.10 (L29/70) Describe the applied anatomy of liver. Describe the clinical features, Investigations and principles of management of liver abscess, hydatid disease, injuries and tumours of the liver</p> <p>3. SU 28.10 (L30/70) Describe the applied anatomy of liver. Describe the clinical features, Investigations and principles of management of liver abscess, hydatid disease, injuries and tumors of the liver Explain anatomical basis of Ascites & Peritonitis</p> <p>4. SU 28.11 (L31/70) Describe the applied anatomy of spleen. Describe the clinical features, investigations and principles of management of splenic injuries. Describe the post-splenectomy sepsis – prophylaxis Explain the anatomical basis of Splenic notch, accessory spleens, Kehr’s sign</p> <p>5. SU 28.12 (L32/70) Describe the applied anatomy of biliary system. Describe the clinical features, investigations and principles of management of diseases of biliary system Mention the clinical importance of Calot’s triangle</p> <p>6. SU 28.12 (L33/70) Describe the applied anatomy of biliary system. Describe the clinical features, investigations and principles of management of diseases of biliary system</p>
--	--	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					<p>7. SU 28.12 (L34/70) Describe the applied anatomy of biliary system. Describe the clinical features, investigations and principles of management of diseases of biliary system Enumerate the sites of portosystemic anastomosis Explain the anatomic basis of hematemesis & caput medusae in portal hypertension</p> <p>8. SU 29.10 (L57/70) Describe clinical features, investigations and management of urethral strictures and urethral injuries</p> <p>9. SU 28.11 (L68/70) Describe the applied anatomy of spleen. Describe the clinical features, investigations and principles of management of splenic injuries. Describe the post-splenectomy sepsis – prophylaxis Explain the anatomical basis of Splenic notch, accessory spleens, Kehr’s sign (revision)</p>
	<p>Dr. Tambe Harshal Sudamrao MBBS, DNB 2004/03/1669,</p>	<p>Professor 11/07/2019 13/02/2023</p>	<p>Regular</p>	<p>Assistant Professor from 08/05/2015 to 10/07/2019 and Associate Professor from 11/07/2019 to 12/02/2023 and Professor from 13/02/2023 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune</p>	<p>Total Lecture: 08</p> <p>1. SURGERY (L-1/25) SU1.3 Describe basic concepts of postoperative care</p> <p>2. SURGERY (L-5/25) SU10.1 Describe the principles of perioperative management of common surgical procedures and Describe the steps and obtain informed consent in a simulated environment</p> <p>3. SURGERY (L-6/25) SU11.1, 11.5 Describe principles of Preoperative assessment. Describe principles of</p>

				411 041	<p>providing post-operative pain relief and management of chronic pain</p> <p>4. SURGERY (L-12/25) SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment</p> <p>5. SURGERY (L- 15/25) DE 4.1, DE 4.2, DE 4.3, DE 4.4 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect tissues of the oral cavity. Discuss the role of etiological factors in the formation of precancerous /cancerous lesions. Identify potential pre-cancerous /cancerous lesions.</p> <p>Counsel patients to risks of oral cancer with respect to tobacco, smoking, alcohol and other causative factors</p> <p>6. SU 14.1 (25/20). Describe Aseptic techniques, sterilisation and disinfection. Classify and describe the different methods of sterilization and disinfection. Discuss the application of the different methods in the laboratory, in clinical and surgical practice Choose the most appropriate method of sterilization and disinfection to be used in specific situations in the laboratory, in clinical and surgical practice</p> <p>7. SU 15.1 (25/21). Describe</p>
--	--	--	--	---------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					<p>classification of hospital waste and appropriate methods of disposal. Demonstrate Infection control practices and use of Personal Protective</p> <p>8. (25/1). History of surgery/Introduction to surgery and allied subjects</p>
	<p>Dr. Sonsale Rajesh Govardhan MBBS, DNB 2006/01/241,</p>	<p>Professor 10/07/2019 13/02/2023</p>	<p>Regular</p>	<p>Assistant Professor from 02/05/2015 to 09/07/2019 and Associate Professor from 10/07/2019 to 12/02/2023 and Professor from 13/02/2023 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p>Total Lecture:16</p> <p>1.SU 1.2 (25/3.) Describe the factors that affect the metabolic responses to injury</p> <p>2. SU 2.1 (24/)</p> <p>4. Pathophysiology of shock, types of shock and principles of resuscitation including fluid replacement and monitoring Define and describe shock, its pathogenesis and its stages</p> <p>3. SU 2.2(25/5.) Describe the clinical features of shock and its appropriate treatment</p> <p>4. SURGERY (L2/25) SU7.1.7.2 Describe the planning and conduct of surgical audit Describe the principles and steps of clinical research in General Surgery</p> <p>5. SURGERY (L-7/25) SU11.6 Describe Principles of safe General Surgery</p> <p>6. SURGERY (L-8/25) SU13.4 Warfare Injuries- Triage.</p> <p>7. SURGERY (L-7/25) SU11.6 Describe Principles of safe General Surgery</p>

					<p>8. SURGERY (L-8/25) SU13.4 Warfare Injuries- Triage</p> <p>9. SURGERY (L-18/25)SU22.1, 22.2 Describe the applied anatomy and physiology of thyroid. Describe the etiopathogenesis of thyroidal swelling</p> <p>10. SURGERY (L-19/25)SU22.4 Describe the clinical features, classification and principles of management of thyroid cancer</p> <p>11. SURGERY (L-20/25)SU22.5 Describe the applied anatomy of parathyroid. Describe and discuss the clinical features of hypo – and hyperparathyroidism and the principles of their management</p> <p>12. SURGERY (L- 21/25)SU23.1, 23.2,23.3 Describe the applied anatomy of adrenal glands. Describe the etiology, clinical features and principles of management of disorders of adrenal gland. Describe the clinical features, principles of investigation and management of Adrenal tumours</p> <p>13. SU 1.1 (25/2).Describe basic concepts of homeostasis, enumerate the metabolic changes in injury and their mediators</p> <p>14. SU 1.2 (25/3.)Describe the factors that affect the metabolic responses to injury.</p> <p>15. SU 2.1 (24/) 4. Pathophysiology of shock, types of shock and principles of resuscitation including fluid</p>
--	--	--	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					replacement and monitoring Define and describe shock, its pathogenesis and its stages 16. SU 2.2(25/5.)Describe the clinical features of shock and its appropriate treatment
	Dr. Talathi Nikhil Ramanlal MBBS, MS, M.Ch (Neuro Surgeon) 2007/04/1078,	Associate Professor 05/06/2025	Regular	Assistant Professor from 02/11/2015 to 04/06/2025 and Associate Professor from 05/06/2025 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041	Total Lecture:01 1.SU 17.4,17.5,17.6 (L4/70)Describe pathophysiology, mechanism of head injuries. Describe clinical features for neurological assessment and GCS in head injuries. Choose appropriate investigations and discuss the principles of management of head injuries.
	Dr. Yadav Indrajit Bhagwan MBBS, MS 2013/11/3370	Assistant Professor 27/11/2024	Regular	Junior Resident from 31/07/2020 to 29/08/2023 and Senior Resident from 04/09/2023 to 26/11/2024 and Assistant Professor from 27/11/2024 till date at Smt. Kashibai Navale Medical College & General Hospital, Narhe, Pune	Total Lecture:04 1.SU 3.1 (25/6).Describe the indications and appropriate use of blood and blood productsand complications of blood transfusion 2. SU 6.1 (25/11).Define and describe the etiology and pathogenesis of surgical infections 3. SU 6.1 (25/12.) Define and describe the etiology and pathogenesis of surgical infections- HIV-AIDS, Hepatitis, Gas Gangrene etc 4. SURGERY (L-3/25) SU8.1, 8.2 Describe the principles of Ethics as it pertains to General Surgery and demonstrate professionalism and empathy to the patient undergoing

					general surgery

Department of Orthopedics

Department	Name of the faculty Qualification IMR Number	Current Designation & Date of promotion	Nature of employment Regular/ permanent or contract/ outsourced	Details of Service in the Last 5 years					Number of lectures taken/ Year. Topics covered
				1	2	3	4	5	
Orthopedics	Dr. Nemade Vijay Vasant MBBS, D-Ortho., DNB-Ortho 83483,	Professor & HOD 13/03/2020	Regular	Associate Professor from 13/01/2017 to 12/03/2020 and Professor from 13/03/2020 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041					<u>Total Lecture-14</u> 1) Describe and discuss the Principles of management of soft tissue injuries. (Batch 2022-23) 2) Develop a systematic clinical approach to joint pain based on the pathophysiology. (Batch 2022-23) 3) Describe and discuss the mechanism of Injury, Clinical features, investigations and plan management of fractures of proximal humerus. (Batch 2022-23) 4) Describe various joints with subtypes and examples. (Batch 2022-23) 5) Describe and demonstrate Shoulder joint for- type, Articular surfaces, capsule, synovial membrane, ligaments,

					<p>relations, movements, muscles involved, blood supply, nerve supply and applied anatomy. (Batch 2023-24)</p> <p>6) Determine the potential causes of joint pain based on the presenting features of joint involvement. (Batch 2023-24)</p> <p>7) Plan and interpret the investigations to diagnose complications of fractures like malunion, non-union, infection, compartmental syndrome. (Batch 2021-22)</p> <p>8) Describe and discuss the aetiopathogenesis, clinical features, assessment and principles of management of Cerebral palsy patient. (Batch 2021-22)</p> <p>9) Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of osteomyelitis. (Batch 2021-22)</p> <p>10) Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of soft tissue tumors. (Batch 2021-22)</p> <p>11) Classify and describe the</p>
--	--	--	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					<p>etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of Paget's disease of the bone. (Batch 2021-22)</p> <p>12) Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of proximal femur. (Batch 2021-22)</p> <p>13) Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of Bone and Joint infections a) Acute Osteomyelitis b) Subacute osteomyelitis c) Acute Suppurative arthritis d) Septic arthritis & HIV infection e) Spirochaetal infection f) Skeletal Tuberculosis. (Batch 2021-22)</p> <p>14) Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of benign and malignant bone tumours and pathological fractures. (Batch 2021-22)</p>
	Dr. Gaikwad Yogesh Ramnath MBBS, MS 71020,	Professor 05/12/2016	Regular	Professor from 05/12/2016 till date at Smt. Kashibai Navale Medical	<p>Total Lecture-10</p> <p>1) Describe and demonstrate Shoulder joint for- type,</p>

				<p>College and General Hospital, Narhe, Pune 411 041</p>	<p>Articular surfaces, capsule, synovial membrane, ligaments, relations, movements, muscles involved, blood supply, nerve supply and applied anatomy. (Batch 2022-23)</p> <p>2) Describe factors influencing infliction of injuries and healing, examination and certification of wounds and wound as a cause of death: Primary and Secondary. (Batch 2022-23)</p> <p>3) Describe the Principles of skin traction, serial casts and surgical treatment including contracture release, tendon transfer, osteotomies and arthrodesis. (Batch 2022-23)</p> <p>4) Enumerate the rights and entitlements of differently abled persons. (Batch 2022-23)</p> <p>5) Describe the anatomical basis of Saturday night paralysis. (Batch 2023-24)</p> <p>6) Develop a systematic clinical approach to joint pain based on the pathophysiology. (Batch 2023-24)</p> <p>7) Participate as a member in team for aspiration of joints under supervision. (Batch 2021-22)</p> <p>8) Explain the anatomical basis of Scoliosis, Lordosis, Prolapsed disc, Spondylolisthesis & Spina</p>
--	--	--	--	--------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					<p>bifida. (Batch 2021-22)</p> <p>9) Describe and discuss the aetiopathogenesis, clinical presentation, identification, functional changes, acute care, stabilization, management and rehabilitation of falls in the elderly. (Batch 2021-22)</p> <p>10) Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of peripheral nerve injuries in diseases like foot drop, wrist drop, claw hand, palsies of Radial, Ulnar, Median, Lateral Popliteal and Sciatic Nerves. (Batch 2021-22)</p>
	<p>Dr.Parekh Hemant Prakash MBBS, MS, DNB 2000/02/0555,</p>	<p>Professor 04/12/2018</p>	<p>Regular</p>	<p>Associate Professor from 16/05/2011 to 03/12/2018 and Professor from 04/12/2018 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p><u>Total Lecture-06</u></p> <p>1) Describe and discuss the aetiopathogenesis, clinical features, investigations, and principles of management of dislocation of major joints, shoulder, knee, hip. (Batch 2022-23)</p> <p>2) Describe knee joint injuries with its applied anatomy. (Batch 2022-23)</p> <p>3) Explain anatomical basis of Osteoarthritis. (Batch 2022-23)</p> <p>4) Describe and discuss the mechanism of Injury, Clinical features, investigations and plan management of fractures of proximal humerus. (Batch 2023-24)</p>

					<p>5) Describe various joints with subtypes and examples. (Batch 2023-24)</p> <p>6) Describe and discuss the principles of physical and social rehabilitation, functional assessment, role of physiotherapy and occupational therapy in the management of disability in the elderly. (Batch 2021-22)</p>
	<p>Dr. Bhandari Prashant Vilas MBBS, DNB-ORTHO 2001/05/2235,</p>	<p>Professor 13/03/2020</p>	<p>Regular</p>	<p>Associate Professor from 14/12/2016 to 12/03/2020 and Professor from 13/03/2020 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p>Total Lecture-08</p> <p>1) Osteoarthritis. (Batch 2022-23)</p> <p>2) Describe the common signs and symptoms of articular and periarticular diseases. (Batch 2023-24)</p> <p>3) Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of various inflammatory disorder of joints. (Batch 2021-22)</p> <p>4) Describe and discuss the clinical features, investigations and principles of management of Congenital and acquired malformations and deformities of: a. limbs and spine - Scoliosis and spinal bifida b. Congenital dislocation of Hip, Torticollis, c. congenital talipes equino varus. (Batch 2021-22)</p> <p>5) Describe the principles of early mobilization, evaluation of the</p>

					<p>residual limb, contralateral limb and the influence of co-morbidities.(Batch 2021-22)</p> <p>6) Regional Injuries: Describe and discuss regional injuries to head (Scalp wounds, fracture skull, intracranial haemorrhages, coup and contrecoup injuries), neck, chest, abdomen, limbs, genital organs, spinal cord and skeleton. (Batch 2021-22)</p> <p>7) Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of spine injuries with emphasis on mobilisation of the patient. (Batch 2021-22)</p> <p>8) Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication. (Batch 2021-22)</p>
	<p>Dr. Darawade Nilesh Dattatray MBBS,MS,D-ORTHO 2005/04/2451,</p>	<p>Associate Professor 05/07/2018</p>	<p>Regular</p>	<p>Assistant Professor from 01/04/2016 to 04/07/2018 and Associate Professor from 05/07/2018 till date at Smt. Kashibai</p>	<p><u>Total Lecture-09</u></p> <p>1) Describe the principles of early mobilization, evaluation of the residual limb, contralateral limb and the influence of co-morbidities.(Batch 2022-23)</p>

				<p>Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<ol style="list-style-type: none"> 2) Enumerate the indications for arthrocentesis. (Batch 2022-23) 3) Describe and discuss the aetiopathogenesis, clinical features, assessment and principles of management a patient with Post-Polio Residual Paralysis. (Batch 2021-22) 4) Demonstrate important muscle attachment on the given bone. (Batch 2021-22) 5) Describe scaphoid fracture and explain the anatomical basis of avascular necrosis. (Batch 2021-22) 6) Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of bone tumors. (Batch 2021-22) 7) Regional Injuries Describe and discuss injuries related to fall from height and vehicular injuries - Primary and Secondary impact, Secondary injuries, crush syndrome, railway spine. (Batch 2021-22) 8) Describe and discuss the mechanism of injury, Clinical features, investigations and principle of management of acetabular fracture. (Batch
--	--	--	--	-----------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

					<p>2021-22)</p> <p>9) Enumerate and describe common life threatening complications following SCI like Deep vein Thrombosis, Aspiration Pneumonia, Autonomic dysreflexia. (Batch 2021-22)</p>
	<p>Dr. Soman Shardul Madhav MS, DNB-ORTHO 2024/12/9732</p>	<p>Associate Professor 13/12/2021</p>	<p>Regular</p>	<p>Assistant Professor from 02/11/2016 to 12/12/2021 and Associate Professor from 13/12/2021 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p><u>Total Lecture-07</u></p> <p>1) Describe the anatomical basis of Saturday night paralysis. (Batch 2022-23)</p> <p>2) Mechanical injuries and wounds: Describe and discuss different types of weapons including dangerous weapons and their examination. (Batch 2022-23)</p> <p>3) Discriminate, describe and discuss distinguishing articular from periarticular complaints. (Batch 2022-23)</p> <p>4) Describe the common patterns, clinical features, investigations, diagnosis and treatment of common causes of arthritis. (Batch 2022-23)</p> <p>5) Describe the principles of early mobilization, evaluation of the residual limb, contralateral limb and the influence of co-morbidities. (Batch 2023-24)</p> <p>6) Describe the Principles of skin traction, serial casts and surgical treatment including contracture</p>

					<p>release, tendon transfer, osteotomies and arthrodesis. (Batch 2023-24)</p> <p>7) Describe and discuss the clinical features, diagnostic work up, work up diagnosis and management of spinal cord injury. (Batch 2021-22)</p>
	<p>Dr.Naik Nimbalkar Aditya Madhavrao MBBS, MS 2015/10/5027,</p>	<p>Assistant Professor 26/11/2021</p>	<p>Regular</p>	<p>Junior Resident from 23/05/2017 to 30/05/2019, Senior Resident from 03/10/2020 to 25/11/2021 and Assistant Professor from 26/11/2021 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p><u>Total Lecture-11</u></p> <ol style="list-style-type: none"> 1) Aids for Mobilising patients with fractures of lower limb & Spine. (Batch 2022-23) 2) Determine the potential causes of joint pain based on the presenting features of joint involvement. (Batch 2022-23) 3) Describe and discuss the aetiopathogenesis, clinical features, investigations, and principles of management of soft tissue injuries. (Batch 2022-23) 4) Define and describe the methods to identify and prevent disability. (Batch 2022-23) 5) Describe and discuss the aetiopathogenesis, clinical features, investigations, and principles of management of dislocation of major joints, shoulder, knee, hip. (Batch 2023-24) 6) Describe and discuss the aetiopathogenesis, clinical features, investigations, and

					<p>principles of management of soft tissue injuries. (Batch 2023-24)</p> <p>7) Discriminate, describe and discuss distinguishing articular from periarticular complaints. (Batch 2023-24)</p> <p>8) Describe and discuss the mechanism of injury, clinical features, investigations and principles of management of fracture of shaft of humerus and intercondylar fracture humerus with emphasis on neurovascular deficit. (Batch 2023-24)</p> <p>9) Explain the anatomical basis of Flat foot & Club foot. (Batch 2021-22)</p> <p>10) Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of pelvic injuries with emphasis on hemodynamic instability. (Batch 2021-22)</p> <p>11) Describe and discuss the clinical features, Investigation and principles of management of Tuberculosis affecting major joints (Hip, Knee) including cold abscess and caries spine. (Batch 2021-22)</p>
	Dr. Patil Rahul Vishwanath MBBS, MS	Assistant Professor	Regular	Junior Resident from 30/05/2017 to 29/05/2020 at	<p>Total Lecture-13</p> <p>1) Common infections of bones &</p>

	2015/10/5036			<p>MIMER Medical College, Talegaon Dabhade, Pune Senior Resident from 13/10/2020 to 02/11/2021 at MIMER Medical College, Talegaon Dabhade, Pune Assistant Professor from 22/06/2022 till date at Smt. Kashibai Navale Medical College and General Hospital, Narhe, Pune 411 041</p>	<p>joints. (Batch 2022-23)</p> <ol style="list-style-type: none"> 2) Describe and discriminate acute, subacute and chronic causes of joint pain. (Batch 2022-23) 3) Describe the common signs and symptoms of articular and periarticular diseases. (Batch 2022-23) 4) Define and describe disability, its cause, and magnitude, identification and prevention of disability. (Batch 2022-23) 5) Describe and discuss the Principles of management of soft tissue injuries. (Batch 2023-24) 6) Describe factors influencing infliction of injuries and healing, examination and certification of wounds and wound as a cause of death: Primary and Secondary. (Batch 2023-24) 7) Describe and discriminate acute, subacute and chronic causes of joint pain. (Batch 2023-24)
